

**Extract from the South Reading NHS CCG October 2013
Performance Report presented by Janet Meek at the board meeting
of 18 December 2013**

Referral to Treatment (RTT) within 18 weeks: treatment
functions/specialties not achieved

Current Period: **RED**

Year to Date: **RED**

South Reading CCG achieved all RTT aggregate standards in August. There were three breaches at specialty level, 1 of which was for admitted pathways in Plastic Surgery, and 2 for incomplete pathways which were Ophthalmology and Cardiothoracic surgery. These breaches were all due to 1 or 2 patients resulting in the specialty breaching, apart from Ophthalmology incomplete. The incomplete breach is subject to an action plan at RBFT with recovery due in September.

During September, the Trust has highlighted to the CCG that the admitted performance in Ophthalmology will deteriorate from September onwards due to a backlog of breaches that need to be cleared. The CCG are arranging a meeting with RBFT to understand this further and to discuss mitigating actions going forward.
